Accounting is an information science used to collect, classify, and manipulate financial data for organizations and individuals. Professionals in accounting analyze financial information and prepare financial reports to determine or maintain record of assets, liabilities, profit and loss, tax liability, or other financial activities within an organization.

Accounting majors at Pitt-Bradford take courses in economics, financial accounting, managerial accounting, income taxation, accounting information systems and auditing. Students have the opportunity to intern with a public accounting firm, a financial service or a corporation. Upon completing the accounting degree, students are on track for CPA certification. Other employment opportunities for accounting majors include working for a small business or a large corporation; governmental agencies, including the FBI, IRS or the DEA; or a financial consulting firm.

**Required Skills:**
