For all students admitted to the ASN Class of 2016, 38.1% have completed the program. An additional 20% of students admitted to the ASN Class of 2016 remain on track with planned graduation in 2017. For the graduating Class of 2016, 86% of graduates completed the ASN program within 2 years, while 14% of students completed the ASN program in ≥ 3 years [*due to extenuating circumstances one student completed the program in 4 years].

Graduates of the Pitt-Bradford ASN program are surveyed at the time of graduation and one year after graduation to collect information about our ASN program outcomes. Historically, one year after graduation, 100% of ASN respondents surveyed are employed. Graduate data for the Class of 2015 will be posted in August 2016.
