The major in Physical Sciences develops an understanding of the natural world by the integrated study of biology, chemistry, mathematics and physics. Students will select a concentration in biology or chemistry. With the major, students are prepared for employment in technical phases of government and industry, as well as for graduate study in the sciences.

Physical science majors at Pitt-Bradford take courses in biology, chemistry, physics and calculus. Students receive hands-on experience by working in the lab and/or field. Students also have the opportunity to become directly involved in research as part of their undergraduate studies.
