CARVE A PANTHER PUMPKIN

1. A set of inexpensive pumpkin carving tools is helpful.
2. Print out pattern
3. Cut along the red diagonal lines, but do not cut through the panther.
4. Draw and cut lid. Clean out pumpkin and scrape down the wall until it is about 1" thick. Pumpkin carving tools or an ice cream shovel are helpful for this.
5. Attach the pattern with tape.
6. Transfer pattern by poking small holes around the edge.
7. Saw dot-to-dot. Occasionally cut out pieces and remove.

When you’re finished, take a photo of your Pitt-Bradford Jack-o-lantern. Post the photo to our Facebook page, www.facebook.com/PittBradford, tweet it to us at @PittBradford or tag it on Instagram with @uPittBradford, and we’ll send you a T-shirt. One T-shirt per pumpkin.
